

I am very concerned about the ownership of multiple broadcast radio stations in one area by one company. The ability of any company to have a quasi-monopoly or complete monopoly (in smaller areas) threatens the ability of consumers of that market to receive a variety of information and entertainment from a variety of sources. My biggest concern in this matter is the proliferation of radio stations owned by ClearChannel Entertainment. They seem to own just about everything in the entertainment industry today, right down to my local malls (aka Westfield Shoppingtowns). Please prevent these companies from taking a stranglehold of all the communications outlets available in our local markets.
